► Part one :Reading Comprehension

▶ Passage 1

Psychologist George Spilich decided to find out whether, as many smokers say, smoking helps them to think and concentrate. He put non-smokers, active smokers and smokers deprived of cigarettes through a series of tests. In the first test, each subject sat before a computer screen and pressed a key as soon as he or she recognized a target letter. In this simple test, smokers, deprived smokers and non-smokers performed equally well. The next test was more complex. Non-smokers were faster, but under the stimulation of nicotine, active smokers were faster than deprived smokers. In the third test of shortterm memory, non-smokers made the fewest errors, but deprived smokers committed fewer errors than active smokers. In the fourth test, nonsmokers were the best, and deprived smokers performed better than those who had smoked a cigarette just before testing. As the tests became more complex, non-smokers performed better than smokers by wider and wider margins.

1- It is mentioned in the passage that the purpose of George Spilich's experiments was to

- a. test the positive effect of smoking on thought and concentration
- b. show how smoking damages people's ability to concentrate
- c. prove that smoking affects people's regular performance
- d. show that non-smokers are less productive at work than smokers

2- We understand from the passage that

- a. deprived smokers in general did not perform better than active smokers
- b. active smokers responded more quickly than the other subjects in all tests
- c. non-smokers were not better than other subjects in the first simple test
- d. deprived smokers gave the slowest responses to the various tasks

3- George Spilich conducted the experiment to

- a, check the effectiveness of nicotine on nonsmokers
- b. test the subjects' concentration under different tests
- c. help the subjects finish the tests quickly
- d. make the subjects recall the words

- a. the public believes about smoking
- b. the subjects needed to stop smoking
- c. smokers thought about positive smoking effects
- d. previous studies on smoking had suggested

5- In three of the four tests performed better than other participants.

- a. deprived smokers b. active smokers
- c. passive smokers d. non-smokers

▶ Passage 2

It is clear that learning methods have evolved with technology over the years ,and most teachings have left the four walls of the classroom .Some still haven't ;but fortunately ,language learning has .There are many reasons that make it necessary to use technology in this field ,one of which is the difficulty of learning a new language .It is a special skill because the process of picking up a new language requires the brain to construct brand new linguistic structures ;a difficult but achievable task .This is another fitting situation for the application of technology .Rather than being forced to comprehend at the speed of classmates ,mobile applications and tutorial videos for language learning help students learn whenever they like ,at their own pace .They

are also useful in cases where one needs to learn how to communicate in specific situations, such as a vacation or business trip. In a traditional learning structure, it isn't always easy to track daily progress. However, students learning with mobile applications can track their daily progress, and may even get suggestions on how and where to improve, depending on the application. With the improvements made by technology in language learning, it is clearly now an easier target.

6- What does the author mean by "teachings have left the four walls of a classroom"?

- a. Home schooling is available for most students.
- b. Traditional methods of teaching are coming back.
- c. Teachings are moving out of traditional classes.
- d. Teachings now hardly depend on technology.

7- Learning a new language is so difficult since it..........

- a. is a time-consuming and boring activity
- b. is very costly for almost every learner
- c. requires both intelligence and advanced technology
- d. requires the brain to build new linguistic structures

8- The passage has included all of the following choices as ways in which technology facilitates language teaching EXCEPT

- a. helping students learn at their own speed
- b. developing quizzes and tests
- c. tracking learners' daily progress
- d. suggesting how and where to improve

9- The author's attitude towards technology-based language teaching and learning seems to be

- a. promising b. disappointing c. pessimistic d. suspicious
- 10- The writer of the passage concludes that technology has made language learning an goal.
- a. advanced b. achievable c. insignificant d. improper

▶ Passage 3

Nine out of ten people breathe polluted air every day. In 2019, air pollution was considered by WHO as the greatest environmental risk to health. Microscopic pollutants in the air can penetrate respiratory and circulatory systems, damaging the lungs, heart and brain, killing 7 million people prematurely every year from diseases such as cancer, stroke, heart and lung disease. Around %90 of these deaths are in low- and middle-income countries, with high volumes of emissions from industry, transport and agriculture, as well as dirty cook stoves and fuels in homes. The primary cause of air pollution (burning fossil fuels) is also a major contributor to climate change, which impacts people's health in different ways. Between 2030 and 2050, climate change is expected to cause 250,000 additional deaths per year, due to malnutrition, malaria, diarrhoea and heat stress.

11- In this passage, WHO in 2019.

- a. highlighted the importance of air pollution
- b. listed the names of all areas polluted
- c. eliminated the problem of pollution
- d. listed all the risks of air pollution

12- According to the passage, organs like lungs, heart and brain
microscopic pollutants when the polluted air is inhaled.

- a. are resistant against
- b. are directly exposed to
- c. would stand away from
- d. would get along with

13- According to the passage, there is a/an relationship between air pollution and the number of related deaths.

- a. negative b. unclear c. unpredictable d. direct
- 14- The negative effect of climate change on people's health is air pollution.
- a. different from that ofb. identical to that ofc. beneficial unliked. superficial unlike

15- Problems like malnutrition, malaria, diarrhoea and heat stress are of climate change.

a. among the causesb. independentc. consequencesd. future sources

▶ Passage 4

The cloning of genes has made many medical advances possible. Human growth hormone (HGH) is a good example. This hormone stimulates the growth of bones and muscles during childhood. Cloning the gene for HGH has provided an increase in the availability of the hormone. However, the availability of HGH and other products of biotechnology raises an ethical question. The hormone is used widely to treat children with dwarfism, a condition that results in an adult height of 4 feet and 10 inches or shorter. Should HGH be available to anyone who wants taller children or only those who have children with dwarfism? Suppose parents want their average-size son to be taller so he will have a better chance of making his high school team. Doctors do not have any evidence that exposure to HGH affects average-size children negatively, but many feel it is unethical to provide it to children with no serious medical need.

16- The writer states that cloning the gene for HGH is.....

- a. quite detrimental b. categorically beneficial
- c. abnormally problematic d. ethically controversial

17- The author of this reading selection seems to

- a. sympathize with children suffering from dwarfism
- b. consider gene cloning unethical in all cases
- c. condemn parents with average-size children
- d. disregard new developments in medical sciences

18- It is implied that regarding height, average-size children

- a. are negatively affected by HGH
- b. are without serious medical need
- c. can be very fit for high school teams
- d. mostly participate in high school teams

19- What does th	e underlined "	<mark>'it"</mark> in the la	st sent	ence refe	er to?
